Impoundment level is 3.95 meters above chart datum and all times are local.

For flood prevention, the lock will be closed to traffic when the tide level outside reaches 5.6 meters above chart datum and will open again when the tide outside recedes to 5.6 meters above chart datum

Passage through the lock is on request whilst the water level within Sutton Harbour remains higher than 3.5 meters above chart datum. If the water level recedes below 3.5 meters above chart datum, passage through will be suspended until the tide level outside reaches 3.5 meters above chart datum.
